Market Commentary

Market declined last week as negative cues from global markets and concerns arising from higher global crude oil prices spooked investors. The rebound in crude oil prices has sparked concerns of its adverse impact on India's macroeconomic fundamentals. Until recently, lower global commodity prices led to optimism regarding India reining in its fiscal and current account deficit. With India importing about 80% of its crude requirements, there are now concerns that higher crude oil prices will result in widening of India's current account and fiscal deficit and increase fuel price inflation. The barometer index, the S&P BSE Sensex, fell 207.28 points or 0.77% to settle at 26,635.75. The Nifty 50 index fell 50.75 points or 0.62% to settle at 8,170.05. For the next week Nifty likely to trade in the range between 8250 – 8350 in the upper side and 8100 – 8050 in the lower side.
